AVYJNR HEALTH TECHNOLOGIES INDIA PRIVATE LIMITED

(Brand Name: O Positive Health)

1. Introduction

AVYJNR Health Technologies India Private Limited, operating under the brand name **O Positive Health**, is a forward-thinking healthcare organization built on vision, resilience, innovation, and an unwavering commitment to patient care.

We are not just a healthcare company. We are a mission-driven organization dedicated to transforming the healthcare journey of patients across India by combining advanced medical technologies, ethical guidance, emotional support, and accessible treatment pathways.

- Our foundation is built on belief.
- Our operations are powered by technology.
- Our identity is rooted in positivity.
- And our goal is simple yet powerful — to ensure that no patient is left untreated due to confusion, fear, affordability, access, or lack of direction.

2. Meaning Behind the Corporate Name

AVYJNR Health Technologies India Private Limited

Our corporate name carries our history, humility, and ambition within it.

2.1 AVY – The Founders' Identity

The initials **A V Y** represent the three founding members:

- **A – Akshay**
- **V – Vaibhav**
- **Y – Yogesh**

When the company was started, it was built collectively by three young visionaries who entered the healthcare and business world with ambition but limited industry experience. AVY symbolizes unity, partnership, and shared responsibility.

It is a tribute to the founders' journey — from beginners to builders.

2.2 JNR – The Power of Being Junior

JNR stands for **Junior**.

When we entered the healthcare market, we were new — inexperienced in the vast ecosystem of healthcare systems, corporate structures, and medical operations. Instead of hiding that fact, we embraced it.

"**Junior**" represents:

- Humility
- Learning mindset
- Hunger to grow
- Adaptability
- Fearlessness to evolve

We started as juniors in the healthcare industry. But being junior meant we had no ego, no rigid mindset, and no limitations. It gave us the courage to innovate, question traditional systems, and build patient-first solutions.

2.3 Health – Our Core Industry

The word **Health** represents our domain and responsibility.

Healthcare is not just a business vertical for us. It is a moral commitment. It represents life, dignity, survival, and well-being.

Everything we build, promote, design, or implement revolves around one central goal:
Improving patient outcomes and making treatment accessible.

2.4 Technologies – The Future of Healthcare

The word **Technologies** defines our operating philosophy.

Modern healthcare is driven by innovation — from robotic surgery to laser treatments, from minimally invasive procedures to AI-based diagnostics. We understand that the future of medicine belongs to those who adopt and implement advanced technologies responsibly.

We:

- Promote new-age medical technologies
- Connect patients to advanced treatment methods
- Use digital systems for patient management
- Leverage technology for marketing and awareness
- Streamline treatment pathways using structured systems

In today's era, healthcare and technology are inseparable. That is why "Technologies" is a critical pillar of our identity.

2.5 India – Our Pride and Responsibility

The word **India** reflects our national identity and pride.

We are an Indian company serving Indian patients.
Our operations are currently India-based, and our mission is to strengthen healthcare accessibility within the country.

Including "India" in our name reflects:

- National commitment
- Cultural responsibility

- Patriotism
- Long-term domestic growth vision

Our dream is to elevate Indian healthcare services to global standards while remaining rooted in Indian values.

2.6 Private Limited – Vision with Structure

We incorporated as a **Private Limited Company** because our vision is long-term and scalable.

A private limited structure provides:

- Legal credibility
- Structured governance
- Financial transparency
- Eligibility for government schemes
- Professional scalability
- Investor confidence

We chose this structure because we are building not just a service — but an institution.

3. Brand Identity – O Positive Health

While AVYJNR represents our corporate identity, **O Positive Health** represents our soul.

This brand name is deeply symbolic and emotionally powerful.

3.1 Meaning of "O"

The letter **O** represents:

- Omni
- Infinity
- Continuity
- Limitlessness
- 360-degree direction

"**O**" symbolizes infinite movement in all directions without boundaries.

Similarly, **O Positive Health** operates beyond limitations.

When a patient comes to us facing challenges such as:

- Financial constraints
- Family resistance
- Fear or anxiety
- Inaccessibility to good doctors
- Technology mismatch
- Lack of clarity
- Previous failed consultations

We:

- do not stop at obstacles.

- explore every possible direction.
- coordinate with hospitals.
- consult multiple doctors.
- analyze alternative technologies.
- negotiate better pricing.
- identify suitable treatment pathways.
- support emotionally and strategically.
- do whatever is ethically possible to ensure the patient receives the best available treatment at the most reasonable cost.

That is why we chose "**O**" — because we do not operate in one direction.
We operate in all directions necessary to solve a patient's problem.

3.2 Meaning of "Positive"

Healthcare begins in the mind.

Before treatment, patients often carry:

- Fear
- Doubt
- Anxiety
- Negativity
- Trauma
- Confusion

At **O Positive Health**, we believe healing begins with positivity.

Before: surgery, medication, consultation

***We*:** remove psychological barriers, counsel patients, educate them, clarify myths, reduce fear, build trust, transform doubt into confidence

That is why "**Positive**" is not just a word in our name — it is our culture.

3.3 O Positive – Combined Meaning

When combined, **O Positive** represents:

Infinite Positivity.

We work with unlimited commitment and unwavering optimism.

Just like the **O Positive blood group**, which is considered universally life-saving in emergency conditions, we strive to be universally supportive in healthcare situations.

From scar removal to complex surgeries, from cosmetic procedures to life-threatening conditions like cancer — wherever medical science offers a possibility, we aim to connect patients to that possibility.

We: do not give up easily, fight challenges, solve problems, coordinate systems, simplify complexity. But we never force patients into decisions. We guide, educate, suggest, empower.The final decision always belongs to the patient.

4.Our Tagline Philosophy

“Care Before Cure”

At O Positive Health, our tagline — **“Care Before Cure”** — is not a marketing statement.
It is a healthcare philosophy.
It is a preventive mindset.
It is a responsibility we carry toward every patient who trusts us.

In today’s world, most healthcare systems focus on cure — they intervene when the disease has already progressed, when the pain has already intensified, when the condition has already become complicated. But at O Positive Health, we believe true healthcare begins much earlier.

We believe healthcare begins with **care.**

4.1 The Meaning Behind “Care Before Cure”

“**Care Before Cure**” represents our belief that:

If proper care is taken at the right time,
many problems never reach the stage where cure becomes necessary.

Prevention is stronger than surgery.
Awareness is stronger than medication.
Guidance is stronger than emergency intervention.

We encourage patients to:

- Take early symptoms seriously
- Seek consultation before complications arise
- Avoid ignoring minor health signals
- Choose lifestyle corrections before chronic conditions develop
- Take informed decisions before fear or misinformation takes control

Our mission is to educate, guide, and support patients in the early stages — when the situation is manageable, reversible, and less financially and emotionally burdensome.

4.2 What “Care” Means to Us

Care is not limited to medical attention.

Care includes:

- Emotional reassurance
- Clear explanation
- Removing anxiety
- Preventive health guidance
- Honest medical direction
- Cost transparency
- Technology awareness
- Regular follow-up reminders
- Long-term health planning

Before recommending any treatment, we first ensure the patient fully understands their condition.

Before suggesting surgery, we evaluate whether alternative options exist.

Before discussing cure, we ensure the patient receives proper care.

Care means: For Us

Standing beside the patient before they feel helpless.
Supporting them before they panic.
Guiding them before they suffer.

Cure may heal the body.
But care protects the future.

4.3 Our Responsibility Toward the Patient

When a patient connects with O Positive Health, our first priority is not “What treatment can be done?”

Our first priority is:

“What care does this patient need right now?”

Sometimes patients need:

- Emotional stability
- Second opinion clarity
- Lifestyle guidance
- Early diagnosis support
- Preventive screening
- Counseling

If timely care is provided, the need for major cure often reduces.

That is why we emphasize early intervention.

We guide patients to act before the condition escalates.
We encourage awareness before emergency.
We promote prevention before procedure.

4.4 Reducing Future Complications

Our commitment is to protect patients from future suffering.

When proper care is taken:

- Minor infections do not turn into major complications
- Early-stage conditions do not reach advanced severity
- Cosmetic concerns do not become psychological trauma
- Small symptoms do not convert into chronic disorders

By focusing on care first, we reduce:

- Financial burden
- Surgical risk

- Emotional stress
- Recovery time
- Long-term damage

We believe healthcare should not always begin in the operation theatre.
It should begin in awareness.

4.5 Internal Culture: We Practice What We Promote

“Care Before Cure” is not only for patients — it is part of our internal work culture.

We:

- Care about ethical standards before business growth
- Care about patient satisfaction before revenue targets
- Care about clarity before commitment
- Care about long-term trust before short-term profit

We build relationships, not transactions.

Our team is trained to listen before advising.

We prioritize understanding before recommending.

4.6 A Preventive Healthcare Movement

Our tagline also reflects a larger vision — to promote preventive healthcare awareness in India.

In a country where many people delay treatment due to fear, finances, or misinformation, we aim to build a culture where:

- People seek guidance early
- Regular checkups become normal
- Preventive screenings are encouraged
- Technology is used for early detection
- Health literacy improves

We want patients to act at Stage 1, not Stage 4.

4.7 How This Connects to O Positive Health

The philosophy of “Care Before Cure” perfectly aligns with our brand identity:

O — Infinite direction
Positive — Unlimited optimism
Care — Early protection
Cure — Final solution

We believe cure is powerful.
But care is transformative.

4.8 Our Promise Under This Tagline

When a patient chooses O Positive Health, we promise:

We : will not wait for your condition to worsen, will not push unnecessary procedures, will not create fear to sell treatment, will first care, will guide, will educate, will protect and only if necessary will help you cure.

4.9 Final Thought

Healthcare is not just about fixing what is broken.

It is about protecting what is still strong.

At O Positive Health, we proudly stand by our belief:

Care Before Cure. - Because when care comes first, cure often becomes unnecessary.

5. Our Mission

To make advanced, ethical, and technology-driven healthcare accessible, affordable, and understandable for every patient in India.

6. Our Vision

To become one of India's most trusted healthcare facilitation and technology-driven treatment platforms, known for integrity, transparency, emotional intelligence, and result-oriented patient care.

7. Our Core Values

7.1 Patient First

Every decision is made keeping the patient's well-being as the top priority.

7.2 Ethical Transparency

No hidden motives. No forced procedures. Clear communication.

7.3 Technology Adoption

We stay updated with new medical innovations.

7.4 Emotional Intelligence

Healthcare is emotional. We treat patients with empathy.

7.5 Affordability Focus

We negotiate and optimize cost wherever possible.

7.6 Relentless Problem Solving

We do not stop at "no." We search for alternatives.

8. What We Do

O Positive Health acts as a healthcare facilitation and technology support platform.

We:

- Guide patients toward suitable treatments
- Connect them with qualified doctors
- Help them understand advanced technologies
- Provide structured consultation pathways
- Offer cost-effective treatment arrangements
- Assist with pre and post-treatment coordination
- Reduce treatment confusion

We bridge the gap between patients and advanced healthcare.

9. Our Approach

Our approach can be summarized in five steps:

1. Understand the patient's condition deeply.
2. Identify appropriate treatment technologies.
3. Connect with the right medical experts.
4. Optimize cost and logistics.
5. Provide emotional and informational support throughout.

10. Long-Term Expansion Vision

Our broader vision includes:

- Insurance integration
- Technology-driven healthcare marketing
- NGO initiatives for underprivileged patients
- Pet healthcare services
- CSR collaborations
- Digital healthcare systems
- Pan-India expansion

We aim to evolve into a multi-dimensional healthcare ecosystem.

11. Our Promise - Only guidance, Only clarity, Only effort, Only positivity.

- No unnecessary pressure
- No manipulation
- No false commitments
- No unethical practices

12. Conclusion

AVYJNR Health Technologies India Private Limited is not merely a company born from ambition. It is a story of humility, learning, courage, and growth.

From being “Juniors” in the healthcare industry to building a technology-backed healthcare platform — our journey represents resilience.

O Positive Health stands for infinite positivity, limitless direction, and unwavering dedication to patient welfare.

We believe healthcare is not just about treatment.

It is about trust.
It is about direction.
It is about hope.
It is about life.

And at O Positive Health, we stand committed to protecting it.

Below is your professionally written, expanded and powerful **Founders Section** — structured for corporate profile, investor deck, or premium brochure use.

You can directly paste this under a heading:

Founders & Leadership

Behind every meaningful organization stands a story of struggle, belief, and vision.
AVYJNR Health Technologies India Private Limited and its brand O Positive Health were not built by privilege — they were built by perseverance.

The founders represent resilience, humility, technical expertise, and strategic ambition.

Akshay Bhatia

Entrepreneur | Healthcare Strategist | Co-Founder – O Positive Health

Akshay Bhatia

Akshay Bhatia is the visionary force behind O Positive Health — a self-made entrepreneur whose journey from a small town to building a healthcare enterprise reflects determination, adaptability, and purpose-driven leadership.

Born and raised in Nasirabad, Ajmer (Rajasthan), Akshay comes from a humble middle-class family. He is the son of Mr. Rakesh Bhatia, a dedicated private electrician, and a resilient homemaker mother who instilled in him discipline, values, and emotional strength.

Growing up in a modest environment, Akshay understood early that life does not reward comfort — it rewards commitment. Financial limitations did not restrict his dreams; they shaped his hunger.

Educational Foundation

Akshay completed his B.Tech from Aryabhatta College, where he developed analytical thinking and technical problem-solving skills.

Understanding that technical knowledge alone is not enough to build impact, he pursued an MBA in Innovation & Strategy from Ajeenkya DY Patil University.

This phase transformed his mindset from job-seeker to value-creator. It strengthened his strategic thinking, business modeling skills, leadership understanding, and entrepreneurial vision.

Professional Journey – Learning Across Industries

With over 7 years of diverse experience across multiple industries, Akshay's journey reflects versatility and resilience.

1. NestAway Technologies – Pune

He began his professional career with NestAway Technologies as an Operations Executive. Here, he managed property operations and rental coordination.

This role taught him:
- Operational discipline
- Customer experience management
- Process efficiency
- Ground-level execution

2. OYO Hotels & Homes

He later joined OYO Hotels & Homes, managing corporate tie-ups for hotel bookings.

At OYO, he learned:

- Negotiation at scale
- Business partnerships
- Revenue structuring
- Corporate relationship building

This exposure sharpened his commercial instincts.

3. Reliance Jio – Leadership Under Pressure

The COVID-19 pandemic brought uncertainty and job loss. Instead of surrendering to circumstances, Akshay returned to his hometown and joined Reliance Jio as a Team Leader, handling Jio Fiber sales operations.

This phase built:

- Team management capability
- Sales leadership
- Crisis resilience
- Performance-driven execution

Adversity did not stop him — it strengthened him.

The Turning Point – Healthcare Awakening

A close friend introduced Akshay to the healthcare facilitation industry through a Delhi-based healthcare company. That exposure opened his eyes to a critical reality:

India's healthcare system had gaps —

- Patients lacked clarity
- Technology awareness was low
- Access to quality treatment was inconsistent
- Fear and misinformation were common

He realized healthcare is not just a commercial sector.
It is a moral responsibility.

That realization changed everything.

Birth of O Positive Health

In 2022, with conviction and courage, Akshay co-founded O Positive Health alongside his younger brother, Dr. Vaibhav Bhatia.

The mission was clear:

To create a healthcare platform that prioritizes care before cure, promotes advanced technologies, ensures affordability, and guides patients with transparency.

Personal Inspiration – A Pillar of Strength

One of the strongest pillars in Akshay's journey has been his aunt (Bhua Ji). Despite being physically challenged, she worked as a librarian at an Army Public School and supported him financially and emotionally during his college years and early entrepreneurial phase.

Her strength became his inspiration. And Her sacrifice became his responsibility.

Akshay often credits her resilience as a defining influence on his leadership mindset.

Leadership Philosophy

Akshay believes:

- Challenges are redirections, not rejections.
- Trust is the foundation of healthcare.
- Technology is the future of medicine.
- Growth must be ethical and sustainable.

From a small-town dreamer to a healthcare entrepreneur, his journey reflects faith, focus, and fearless execution.

His mission remains simple yet powerful: To build impactful healthcare solutions that transform lives while creating sustainable business growth.

Dr. Vaibhav Bhatia

Clinical Strategist | Director | Co-Founder – O Positive Health

Dr. Vaibhav Bhatia represents the clinical backbone of O Positive Health.

When the company was conceptualized, he was pursuing his Bachelor of Physiotherapy (BPT). Even during his academic years, he provided medical insight, healthcare understanding, and ethical guidance that shaped the foundation of the organization.

He later completed his Master of Physiotherapy (MPT), strengthening his clinical expertise and evidence-based approach to patient care.

Why His Role Was Crucial

In the healthcare industry, credibility is everything.

Patients do not trust unknown entities easily. They seek medical authority, professional validation, and ethical reassurance.

At the early stage of the company:

- Akshay did not have a strong network of senior doctors.
- Building credibility was essential.
- The company required clinical direction.

Having a qualified medical professional as Director was not just strategic — it was necessary.

Dr. Vaibhav brought:

- Medical knowledge
- Clinical validation
- Ethical screening of cases
- Professional credibility
- Emotional support during decision-making

He ensured that O Positive Health would never operate as a purely commercial entity.

Every treatment pathway is evaluated through medical understanding first.

His Contribution Beyond Degrees

Beyond qualifications, Dr. Vaibhav has been:

- A moral support system
- A clinical advisor
- A trust-building pillar
- A bridge between patients and medical science

His presence ensures the company maintains integrity and clinical authenticity.

In a world where healthcare businesses often prioritize profit, his involvement reinforces patient-first values.

Yogesh Prajapati

Co-Founding Member | Strategic Support (Initial Phase)

Yogesh Prajapati

Yogesh Prajapati was one of the original co-founding members of AVYJNR Health Technologies India Private Limited.

He completed his MBA alongside Akshay from Ajeenkya DY Patil University, belonging to the same batch and academic environment.

Originally from Vadodara, Yogesh comes from a hardworking family background. His father is a laborer, his mother a homemaker, and he has two sisters and one younger brother.

Like many middle-class families in India, financial stability is not optional — it is essential.

Early Contribution

In the initial six months of building the company, Yogesh supported the vision with:

- Strategic discussions
- Business planning inputs
- Moral encouragement
- Foundational brainstorming

He believed in the idea and contributed within his capacity.

A Practical Decision

However, entrepreneurship demands time, patience, and financial cushioning.

Due to personal financial responsibilities, EMIs, and family support obligations, Yogesh needed stable monthly income for survival and security.

He made the practical decision to join another organization for steady employment.

His exit was not due to lack of belief — it was due to responsibility.

Sometimes leadership means choosing stability for family over risk for ambition.

And that decision deserves respect.

Acknowledging His Role

Every company's foundation includes people who contribute at different stages.

While Yogesh's journey with O Positive Health was short, his early involvement remains part of the company's origin story.

Entrepreneurship is unpredictable, and each individual walks a different path.

His story represents realism, responsibility, and the courage to prioritize family when required.

Collective Founding Spirit

Together, the founding journey of O Positive Health reflects:

- Small-town beginnings
- Middle-class values
- Educational ambition
- Financial struggle
- Learning across industries
- Healthcare responsibility
- Strategic growth mindset

From humble backgrounds to building a healthcare enterprise, the founders embody resilience and forward-thinking leadership.

They did not inherit a business. They built one. They did not enter healthcare for profit alone. They entered to create impact.

And that impact continues to expand.

Founder's Story

A Promise Made to a Little Girl

Behind every meaningful organization lies a moment — a defining turning point when business transforms into purpose.

For Akshay Bhatia, that moment came during one of the darkest periods in recent history — the COVID-19 pandemic.

When Uncertainty Became Opportunity

The pandemic disrupted the world, Jobs vanished overnight, Businesses collapsed, Dreams were paused.

Akshay, who holds an MBA in Innovation & Strategy from Ajeenkya DY Patil University and a B.Tech in Electronics & Communication, never planned to enter the healthcare sector.

His professional path had moved across real estate, hospitality, and telecommunications. Healthcare was never part of his original blueprint.

But sometimes, purpose chooses you.

After losing his job during COVID, he joined a healthcare coordination company — a platform that connected patients with hospitals. It was meant to be temporary. Just another stepping stone.

Until one phone call changed everything.

The Call That Changed His Life

One afternoon, Akshay received a call from a mother.

She was a single parent.
A daily wage worker.
Financially fragile, yet emotionally unbreakable.

Her 11-year-old daughter had been blind since early childhood. Government hospitals had reviewed her case. The condition was complicated. Risk was high. No doctor wanted to take responsibility.

She had already been turned away multiple times.

But her voice did not carry defeat.

It carried determination.

She said:

"Paise chahe jitne lagenge, main arrange kar lungi… bas meri beti ki aankhen theek ho jayein."
(Whatever the cost may be, I will arrange it… I just want my daughter to see.)

That sentence pierced through him.

This was no longer about coordination.
It was about responsibility.

Fighting When Others Refused

Akshay began reaching out to doctors — one after another.

Some declined.
Some avoided risk.
Some quoted fees the family could never afford.

Finally, one doctor agreed to evaluate the case.

The consultation fee itself was unaffordable for the mother.

Without hesitation, Akshay paid it from his own pocket.

The total estimated treatment cost was ₹40,000.

At that time, Akshay's own monthly salary was ₹30,000.

Financially, it made no sense.
Emotionally, there was no alternative.

He arranged a 2-year EMI plan under the mother's name — something nearly impossible for a daily wage worker.

He stood as guarantor.

He took the risk on himself.

Because sometimes humanity demands courage beyond logic.

The Message Before Surgery

Before the surgery, the little girl called him from her mother's phone.

Her words remain etched in his memory:

"Bhaiya, mujhe apni photo bhej do… meri aankhen theek hone ke baad sabse pehle main aapko dekhna chahti hoon. Aap mere liye bhagwan ho."
(Brother, please send me your photo… when my eyes are healed, I want to see you first. You are like God to me.)

In that moment, Akshay realized something profound:

Healthcare is not a service.
It is trust placed in human hands.

His eyes filled with tears.

The surgery was performed.

It was successful.

And that day — without paperwork, without branding, without funding — **O Positive Health was born.**

Not as a company. But as a mission.

From One Life to a Larger Vision

That experience changed his perspective permanently.

He asked himself:

If one executive can change one life…
What can an entire organization do?

He envisioned a platform where:

- No patient feels abandoned
- No mother is turned away due to risk
- No family suffers due to lack of guidance
- No treatment is delayed due to confusion
- No one fights the healthcare system alone

And that vision became O Positive Health.

Building Clinical Strength

To strengthen medical credibility and ethical foundation, Akshay partnered with his younger brother, Dr. Vaibhav Bhatia.

Dr. Vaibhav, a qualified physiotherapist with an MPT from Manav Rachna International Institute of Research and Studies, brought clinical insight, medical validation, and professional credibility to the organization.

Together, they built not just a coordination company —
But a bridge between patients and the right hospitals.

The Struggles Behind the Mission

The early days were far from glamorous.

Savings ran out. Resources were limited. Trust had to be earned from scratch. Hospitals were cautious. Doctors were skeptical. The healthcare ecosystem does not easily accept new entrants.

Every case required proof.
Every referral required performance.
Every promise required delivery.

But persistence creates credibility.

Earning Trust, One Case at a Time

Today, O Positive Health is associated with some of India's respected hospital networks, including:

- Fortis Healthcare
- Manipal Hospitals
- Dr Agarwals Eye Hospital
- ASG Eye Hospitals

What once seemed like a risk has evolved into a growing healthcare movement.

A Different Business Model

O Positive Health operates on a rare principle:

✔ Patients do not pay the company.
✔ Payments go directly to hospitals.
✔ Treatments are arranged at optimized, reduced costs.
✔ Growth happens through referrals — not aggressive marketing.

Because trust cannot be bought.
It must be earned.

One satisfied patient often brings three or four more.

That is not marketing.
That is belief.

A Mission Beyond Profit

For Akshay, every successful surgery is personal.

Every discharge summary is emotional.

Every recovery reminds him of that 11-year-old girl who wanted to see the world — and his photograph — for the first time.

That promise still guides him.

O Positive Health is not built on revenue targets.
It is built on responsibility.

It stands as a commitment:

As long as we stand between patients and the healthcare system,
no one will feel alone in their fight.

And This Is Only the Beginning

From one mother’s call…
To thousands of patient journeys…

From uncertainty…
To purpose…

From job loss…
To life-changing mission…

The story of O Positive Health is still being written.

And its foundation will always remain the same:

Care before Cure.
Positivity before Fear.
Responsibility before Profit.

Corporate Identity, Registrations & Growth Journey

Legal & Incorporation Details

AVYJNR Health Technologies India Private Limited was officially incorporated on **29 November 2022**, marking the formal launch of a vision-driven healthcare enterprise committed to ethical, technology-enabled, and patient-centric medical facilitation across India.

Head Office - Gurgaon, Haryana, India

Registered Office Address - #69/08, DLF Phase 3, U Block, Sector 24, Gurgaon, Haryana – 110020, India

Branch Office (Operational Office)

O Positive Health, Opposite Nirankari Bartan Bhandar, Mangu Mohalla, Ghitorni, New Delhi – 110030, India

This branch office currently serves as an active operational coordination center for Delhi NCR cases and patient handling.

Statutory & Registration Details

The company operates under full legal compliance with the Government of India.

- **CIN:** U85110HR2022PTC108032
- **GST Number:** 06AAXCA9682L1ZM
- **PAN:** AAXCA9682L
- **TAN:** RTKA23473C
- **UDYAM Registration Number:** UDYAM-HR-05-0057126
- **Startup India Certificate No.:** DIPP119888
- Recognition under Startup India strengthens the company's credibility as an emerging innovation-driven healthcare enterprise.

Banking Details

For financial transparency and compliance, the company maintains its official banking operations through:

- **Account Name:** AVYJNR Health Technologies India Private Limited
- **Account Number:** 258448534103
- **IFSC Code:** INDB0000514
- **Bank Name:** IndusInd Bank
- **Branch:** Old Judiciary Complex (Sector 15), Gurgaon
- All financial transactions are routed through structured and traceable banking channels, ensuring compliance and accountability.

Official Contact Information

- **Company Mobile:** +91 8448534103
- **Email:** info@opositivehealth.com
- **Brand Name:** O Positive Health

Geographic Operational Presence

Currently, O Positive Health actively provides healthcare facilitation services in:

- Delhi NCR (Gurgaon, Delhi, Faridabad, Ghaziabad)
- Mumbai
- Pune
- Bangalore
- Hyderabad

Service Distribution Model

- **Delhi NCR & Mumbai:** Multi-specialty healthcare services across all treatment categories.
- **Pune, Bangalore & Hyderabad:** Specialized focus on Ophthalmology (Eye Care Services).

Healthcare Network Strength

In a short span, the organization has built a strong and reliable nationwide ecosystem.

PAN India Healthcare Network Includes:

- **700+ Hospitals**
- **1000+ Qualified Doctors**
- **500+ Treatable Diseases & Conditions**
- **2000+ Successful Surgeries Facilitated**

This growing ecosystem reflects trust earned through performance, ethical conduct, and consistent patient satisfaction.

The company continues to expand partnerships with hospitals, specialty centers, and independent medical experts across India

Scale of Impact

Despite being a relatively young organization, O Positive Health has already facilitated:

- Thousands of consultations
- Over 2000 life-changing surgical procedures
- Multi-city coordination cases
- High-risk and complex treatment arrangements
- Affordable treatment pathways for financially constrained patients

Each case represents not just a transaction, but a transformed life.

The Humble Beginning – From 1 RK to Corporate Office

Every successful organization has a beginning.
O Positive Health began with courage — not capital.

The company was initially started from a small **1 RK space with just 1 employee**.

There was no large funding.
No investor backing.
No established hospital partnerships.

Only belief.

As patient trust increased and case volume grew:

- The team expanded.
- Operations shifted to a **1 BHK setup**.
- Then upgraded to a **2 BHK workspace**.
- And eventually transitioned into a structured office environment.

This journey from a single-room startup to a growing multi-city healthcare facilitator reflects:

- Consistent reinvestment
- Sustainable growth
- Operational discipline
- Patient-driven expansion

Growth was organic — built on performance and referrals.

Operational Philosophy

Unlike many healthcare intermediaries:

✔ Patients are not charged by the company.
✔ Payments are made directly to hospitals.
✔ Treatment costs are negotiated and optimized.
✔ Growth is largely referral-driven.

This transparent model has strengthened brand credibility in competitive healthcare markets.

Operational Model & Structure

The company operates through a coordinated healthcare facilitation framework that includes:

1. Patient onboarding & case evaluation
2. Medical report assessment
3. Doctor & hospital matching
4. Cost optimization & negotiation
5. Treatment scheduling
6. EMI & financial structuring assistance (where applicable)
7. Pre and post-treatment coordination

This structured approach ensures consistency and reliability across all operational cities.

Growth Trajectory Since Incorporation

Since its incorporation in November 2022, the company has demonstrated:

- Rapid hospital network onboarding
- Multi-city operational expansion
- Strong referral-based growth
- Increased brand recall in Delhi NCR & Mumbai
- Progressive specialization in ophthalmology in emerging cities

The growth reflects strong leadership, strategic networking, and a patient-first model.

Digital Presence & Brand Outreach

In today's technology-driven healthcare ecosystem, digital credibility plays a vital role in building patient trust, transparency, and engagement.

O Positive Health actively maintains a strong digital footprint across major social media platforms to:

- Educate patients
- Share health awareness content
- Showcase treatment success stories
- Build trust through transparency
- Connect with communities across India
- Strengthen professional healthcare networking

Our social platforms serve as an extension of our mission — promoting **Care Before Cure** through knowledge, positivity, and responsible healthcare communication.

Official Social Media Channels

- Preventive care awareness
- Patient success journeys
- Motivational healthcare content
- Behind-the-scenes growth moments

Digital Strategy Vision

We believe healthcare awareness should not begin inside a hospital — it should begin online, where patients search first.

Through our digital platforms, we aim to:

- Reduce misinformation
- Encourage preventive checkups
- Promote early diagnosis
- Share real patient journeys
- Create a trustworthy healthcare ecosystem

Our digital presence reflects transparency, authenticity, and long-term relationship building rather than aggressive advertising.

Future Digital Expansion Plans

To further strengthen our digital impact, we plan to:

- Launch YouTube health education series
- Start patient testimonial video campaigns
- Introduce AI-driven chat assistance
- Build a teleconsultation support system
- Expand healthcare blog & knowledge portal
